Not a single word lost

with the Philips handheld microphone

The Philips multifunctional handheld microphone with built-in speaker turns your Philips desktop transcription system into a dictation recorder.

Superior audio quality

- High-quality microphone for superb recording quality
- Integrated speaker ensuring crystal clear playback
- Adjustable microphone sensitivity for better sound quality

Designed for professionals

- A perfect companion for your desktop transcription machine
- Ergonomic slide switch for efficient one-thumb operation
- Durable materials enhance quality for extended use

Highlights

High-quality microphone

The high-quality microphone picks up every acoustic detail for perfect sound reproduction.

Crystal clear playback

The built-in front speaker guarantees crystal clear playback of your dictation files.

Adjustable recording sensitivity

Recording sensitivity can be changed to avoid background noises and adjust to the recording environment.

A perfect companion

The Philips multifunctional handheld remote microphone with built-in loud speaker turns your transcription desktop into a dictation recorder.

Slide switch operation

Easy and quick file editing via convenient slide-switch operation. It offers a fast response and is designed for single-handed operation.

Highly durable

Durable and premium quality materials make the handheld microphone suitable for extended use.
